Guideline for paper report

**Question 1:** Summarize your paper. (1-2 sentences)

**Question 2:** How does this work relates to human-computing or crowdsourcing? (1-2 sentences)

**Question 3:** What is the main contribution of this work? (1-2 sentences)

**Question 4:** What are the strength/weaknesses of this paper? (1-2 sentences)

**Question 5:** Do you like/dislike this paper? Justify. (2-3 sentences)

Guidelines for project report

The report must be approximately 4 pages (3 pages if you did the project alone, 5 pages if you were two) long and includes 5 sections (introduction, methods, results, discussion, references). Each section must address the following points.

**Introduction:** How does your project relates to human-computing or crowdsourcing? Which problem in human-computing does it address? Report previous related work (listed in References).

**Methods:** What does the software you implemented? What is the input/output? Where are human actions involved? If no benchmark is available, provide a clear step by step example of how your system run.

**Results:** Is your software available? How did you test it? Did you run any experiment/benchmark? Did you produce any quantitative results?

**Discussion:** Why human can perform this tasks better than computer? How would you deploy your work? What are the next steps? How did this work contributed to advancing knowledge? Did it open/closed research questions?

**Contribution:** If you this is a team project, indicate the precise contribution of every team member.
