Harriet Jane Howard BA 1929

Because I associate Prof. Holburn more with Jane than with anyone else in the family I am putting this page in next to those on Jane who visited him and his wife and sons in Parkat Castle during her years in Oxford. Self. Date has supplied me with the following:

March 24th 1984

Professor Holburn

I am Bernard Siaghon Holburn was a great friend of my father's at Oxford and later. He used to visit us twice yearly on his trips between his teaching post at a mid-western university (I think Illinois) where he lectured on architecture and his home just south of Edinburgh.

He was of a prosperous family of tea merchants in London, partly Jewish, of which he was very proud. His mother was a Scot, and "Uncle" Bernard, in his own mind, became very Scottish. He purchased the Island of Foola north of the Shetlands where he was the laird for many years and his wife was the mainstay of the island economy, organizing cottage industry and selling its various artifacts on the mainland.

The Holburn's home south of Edinburgh was an ancient castle (Parkat) which "Uncle" Bernard had gutted and refitted to his taste and filled with items which he had picked up in his travels: i.e., a circular stair case from a much grander castle which was being destroyed; a Spanish clock from one of the Armada ships wrecked on the north coast of Ireland.

He was an eccentric in manner and dress — wore a sage secured with a heavy silver shawl hat he had picked up in inland China in the 1890's, a massive soft bow tie and a very wide brimmed felt hat — all dark green. When in Scotland he wore "the kilt" (name of your short pull-on skirts but yards of tartan cloth wound round and round, its end hung over one shoulder and the whole thing controlled with a massive silver brooch).

He was a consummate Story Teller with an intimate knowledge of mythology: Ganes, Sets and Norse. This made him a quasi favorite of children where-
ever he went.

Spain came from a much grander castle which was being destroyed; a Spanish vessel from one of the Armada ships wrecked on the north coast of Ireland.

He was an eccentric in manner and dress — wore a cape secured with a heavy silver shabra that he had picked up in inland China in the 1890's, a massive soft bow tie and a very wide brimmed felt hat — all dark green. When in Scotland he wore "the kilt" (none of your short pull-on skirts but yards of tartan cloth wound round and round, the end hung over one shoulder and the whole thing controlled with a massive silver brooch).

He was a consummate story teller with an intimate knowledge of mythology: Greek, Scots and Norse. This made him a great favorite of children wherever he went.

Among other things, he was a survivor of the sinking of the Lusitania, and adapted a little girl whose life he saved on that occasion.

I can remember that we particularly enjoyed his imitations of music-hall routines on his visits to us.

He had two sons, one of whom became an engineer, the other a naval architect and well known yachtsman.

* FOUR: of its west coast of the Shetlands.

The following is the obituary which appeared in The Gazette following James' death on July 6th 1957: (She is buried in the Magog cemetery next to her parents)
