Vianney de Barmon
École Spéciale Militaire de Saint-Cyr

Dear Vianney,

I am happy to invite you to visit my research lab at the School of Computer Science, McGill University to serve as a student research trainee, over the period from September 18, 2017 to December 8, 2017.

During your time here you will work on a research topic within the lab, selected to be appropriate to your skills and interests, aiming to establish and/or demonstrate an interesting research result of interest in the games domain. You will be provided with space and suitable equipment within my research lab to conduct this work, and will be expected to interact with other, graduate and undergraduate students within the lab. Guidance on the work will be provided, and progress monitored, through regular meetings with me. A short presentation of your research results to other members of the lab will be required at the end of the semester, prior to your departure.

I hope this will be a positive and rewarding research experience, and I look forward to your arrival. Please feel free to contact me if you have any specific questions.

Sincerely,

Clark Verbrugge
Associate Professor
