COMP 204
Review session

Mathieu Blanchette
Important notes about midterm exam

- Location: STBIO S1/3 (Last name starting with A-F), STBIO S1/4 (Last name starting with G-S) and STBIO S3/3 (Last name starting with T-Z)
- Students with conflicts: You should have received info from me already.
- You are allowed one double-sided crib-sheet
- **Bring your student ID card with you**
- No calculators, computers, phones, electronics
- Exam structure: Mix of multiple choice questions and written Python programming
- Since this is the first time the course is offered there is no previous exams to train with. But see selected questions from COMP 364 midterm and final exams (posted on MyCourses).
# what will this print?

def my_function1():
    x = 2
    print("1")
    return x

def my_function2(x):
    print("x")
    x = my_function1()
    print(x)

def my_function3():
    print("3")
    x = my_function1()
    my_function2(3)
    print(x)
    print("done")

x = 1
my_function3()
Example question: function calls

```python
# what will this print?

n = 5
for i in range(2, n):
    j = 0
    while j <= i:
        print(j)
    j = j + 2
```
COMP 364 midterm exam
