GROUP #	

PROGRAMS

	3 GoLite (.go) semantics test programs for your chosen areas	
PROGRAMS	(a) Program is valid according to the reference compiler (b) Program correctly tests for the GoLite semantics (c) Program includes comments for verification script	/10

REPORT

	An ideal report for the semantics of Go and your target language should contain enough information to correctly implement a code generator (in the range of 3 pages). For each area we evaluate if:	
GOLITE	**[15 points]** Explanation of the language semantics is correct and sufficient to implement a fully functional code generator **[12 points]** Explanation of the language semantics is correct but missing some minor details necessary to implement a code generator **[6 points]** Explanation of the language semantics is correct but missing major necessary details **[6 points]** Explanation of the language semantics is correct but minimal **[3 points]** Explanation of the language semantics describes incorrect behaviour	/15
